

GALVANIZED WIDE CLAMP

Dust & Fume Solutions Pty Ltd

FUNCTION:

- Joins and secures larger diameter ducts in ventilation and air conditioning systems.
- Prevents air leakage and ensures efficient airflow.

SIZE RANGE:

- 200mm - 800mm

MATERIAL:

- High Quality Galvanized Steel

TYPE:

- Single band clamp with single nut and bolt for tightening.

FEATURES:

- **Sturdy Construction:** Made from quality galvanised steel for strength and durability
- **Single Band Design:** Provides a secure connection with a single nut and bolt tightening mechanism
- **Wide Design for Larger Diameter Ducts:** Offers more support at the join of larger diameter ducts
- **Corrosion Resistance:** Galvanised steel construction prevents rust and ensures longevity

BENEFITS:

- Secure ductwork joints, minimizing air leakage for improved efficiency
 - Enhanced support for larger diameter ducts, reducing the risk of movement or disconnection
 - Easy installation with simple tightening mechanism
 - Long-lasting durability for reliable performance
