

GALVANISED LEVER CLAMP

FUNCTION:

- Provides quick and secure assembly of ductwork
- Ensures a tight and leak-free seal to maintain optimal airflow
- Facilitates easy dismantling and reassembly of duct as needed
- Offers reliable support and stability at the join point
- Suitable for a wide range of duct sizes and applications

SPECIFICATIONS:

Material: Stainless Steel
Size: Size range of 80mm to 800mm

FEATURES:

- Quick assembly of duct with clamp levers
- Rubber seal prevents air leakage
- Designed for easy dismantling of duct
- Wide body for enhanced support at the join
- Made from durable galvanised steel for long-lasting performance

BENEFITS:

- Secure ductwork joints, minimizing air leakage for improved efficiency
- Enhanced support for larger diameter ducts, reducing the risk of movement or disconnection
- Easy installation with simple tightening mechanism
- Long-lasting durability for reliable performance
